

READY TO USE

BIODIVERSITY

Together we enlarge biodiversity

Our plant mats can break the hardening, urbanization and repetitiveness of our urban environment! By using our plant mats, your projects are working for the enlargement of biodiversity.

Work together to bring back green

The world around us has been built on intensively, or used for agriculture. The environment of several organisms has been damaged by that. Thankfully we see a lot of initiatives that combine a good environment for people and nature, with plants as an important link. The Covergreen® plant mats are a quick way to green an grey environment!

Blooming plants

With our plant mats you can easily create a good and green environment for a better soil life, the insects and other animals. Take the Covergreen® Nepeta and Covergreen® Geranium; these beautiful ground covers stand out because of their colorful nectar giving bloom and are a true magnet for bumblebees, bees and butterflies!

Gardens & public green

Variety enhances a good environment for several kinds of organisms. You can combine multiple plant mats in your projects; it strengthens the biodiversity!

Even the roof

Our Sedum plant mats and Sedum cassettes contain a mix of multiple kinds of Sedum. This provides several blooming periods, which all attract their own insects. With Sedum roof covering even a simple roof offers possibilities for a better environment for organisms, but also for people!
