

READY TO USE

THE GREEN ROOF OF THE FUTURE

The Sedum cassette by Covergreen® is the road to a greener living environment for people, nature and animals.

Greening

These sedum trays contribute to a greener environment, by reducing the CO2-emission and increasing biodiversity.

Ready to use

Because of the simple installation of these Sedum trays, you don't need to build them layer by layer. These cassettes will be delivered ready to use.

An instant green roof

With the simple clicking system it is easy to install the ready to use Sedum cassettes, with an instant green result.

Sustainable

The Sedum plants prevent heat better than traditional roofs. They also retain more rainwater, because of their water buffering features.

Biodiversity

These cassettes are grown with several Sedum plants. This ensures a lot of colour and increases the biodiversity.
